# AFTERCARE SUPPORT

Even after delivery, installation and training, our services do not stop there. The Oculus laser cutting machine comes with lifelong technical support via email and telephone. On installation, you will be given direct contact details for your dedicated engineer and office-based technical support from our team of engineers should you require any assistance after your machine has been installed. In addition, all Oculus lasers include one years parts and labour warranty.

Our dedication to customer service continues with our new Customer Portal. The Customer Portal is available to all Opus customers. Here you find helpful videos for the day-to-day running of your laser machine, as well as housekeeping tips, tutorials and troubleshooting guides.

You can also log any issues on our new online ticket portal system if you need advice. In addition, our trained team of in-house engineers will ensure all tickets are dealt with promptly.
